TURF CLEANER

OXYTURF WEED KILLER

Powerful. Safe. Ready to Spray.

OXYTURF X is a premium, ready-to-use weed and grass killer developed specifically for synthetic turf environments. This fast-acting, broad-spectrum herbicide is *non-toxic*, *non-selective*, and engineered for professional results—without the harsh chemicals found in conventional weed control products. Whether you're maintaining a backyard putting green, a commercial turf installation, or edging around hardscapes, OXYTURF X offers unmatched convenience and performance.

Key Features & Benefits

- **Turf-Safe & Eco-Conscious:** Designed specifically for use around synthetic turf, hardscape borders, driveways, fence lines, and anywhere invasive weeds pop up. OXYTURF X delivers results without damaging artificial grass or contributing harmful residues to the surrounding environment.
- **Non-Toxic & Pet Friendly:** Unlike traditional herbicides that contain glyphosate or harsh chemicals, OXYTURF X uses a non-toxic formulation that is safe around pets, children, and delicate landscaping—when used as directed.
- **Ready-to-Use Convenience:** No measuring, no mixing, no guesswork. OXYTURF X comes pre-diluted and ready to spray, making it the ultimate grab-and-go solution for homeowners, contractors, and landscape professionals alike.
- **Rapid Results:** Notice visible wilting and browning within 24 hours of application. OXYTURF X gets to work fast, breaking down the cell structure of unwanted vegetation to ensure effective control—right down to the roots.
- **Broad-Spectrum Control:** Handles a wide range of common weeds and grasses including crabgrass, dandelions, clover, spurge, plantain, and more. Ideal for eliminating stubborn growth in cracks, seams, and edges around turf installations.

How to Use

1. Shake well before use.
2. Try in an inconspicuous area, to make sure the solution does not harm your artificial turf. Let sit for 24 hours.
3. Apply generously to unwanted vegetation until leaves are visibly wet.
4. Avoid spraying desirable plants.
5. Visible results typically appear within 24 hours.
6. Reapply as needed for regrowth or resistant species.

No rinsing is required. Simply spray and let nature (and science) take care of the rest.

Best For:

- Synthetic turf edges and infill seams
- Hardscape cracks, paver joints, driveways
- Fence lines and landscape borders
- Between stepping stones or gravel areas
- Around play areas or pet runs
